1590L 15-inch LCD Open-Frame Touch Display

The Elo 1590L 15" open-frame LCD touch display complements the Elo expanding family of touch solutions for kiosks, casino and amusement, retail self-service, and industrial floor automation. Featuring a slim design and narrow outside dimensions, the state-of-the-art energy-saving LED backlight uses less electricity to operate and generates less heat.

This compact touch display is “designed for touch,” with proven Elo expertise and reliability built in. The 1590L provides stable “drift-free” operation with outstanding image clarity and light transmission—for accurate touch responses and vivid images.

The touchscreen is sealed against dirt, dust and liquids, which simplifies integration into the final enclosure. Long-lasting product availability can be expected as the design and tooling is controlled by Elo specifications.

The 1590L is available with a choice of industry-leading touch technologies, in both single touch and multi touch versions. The seamless zero-bezel 15"

multi-touch display is available with our latest projected capacitive (PCAP) 2GS (two glass solution) technology that delivers both a ten touch “tablet like” interactive experience along with thru-glass functionality - both modes support single or dual latex gloves as well as cloth gloves. Standard bezel, single-touch display options include AccuTouch® five-wire resistive, IntelliTouch® SAW or SecureTouch® anti-vandal SAW.

At Elo, we design, build and are responsible for the complete solution with touch integrated from the start. We use our own touchscreens combined with our software and drivers, everything is designed to work together and tested as part of our life testing processes.

Worldwide agency approvals cover the whole display, which is developed, built, serviced and supported by a true single source supplier. The 1590L open-frame LCD touch display provides an economical solution for system integrators and VARs.

1991L 19-inch Open-Frame Touch Display

The Elo 1991L 19" open-frame LCD touch display features a slim design and narrow outside dimensions due to the state-of-the-art energy-saving LED backlight, using less electricity to operate and generating less heat. Featuring a brilliant wide viewing angle panel, the 1991L instantly grabs and holds the users' attention for kiosks, casino and amusement, retail self-service, and industrial floor automation.

This compact touch display is “designed for touch” with proven Elo expertise and reliability built in. The 1991L provides stable “drift-free” operation with outstanding image clarity and light transmission—for accurate touch responses and vivid images. The touchscreen is sealed against dirt, dust and liquids, which simplifies integration into the final enclosure. Long-lasting product availability can be expected as the design and tooling is controlled by Elo specifications.

The 1991L is available with a choice of industry-leading touch technologies, in both single touch and multi touch versions. This seamless zero-bezel 19"

multi-touch display is available with our latest projected capacitive (PCAP) 2GS (two glass solution) technology that delivers both a ten touch “tablet like” interactive experience along with thru-glass functionality - both modes support single or dual latex gloves as well as cloth gloves. Standard bezel, single-touch display options include AccuTouch® five-wire resistive, IntelliTouch® SAW or SecureTouch® anti-vandal SAW.

At Elo, we design, build and are responsible for the complete solution with touch integrated from the start. We use our own touchscreens combined with our software and drivers, everything is designed to work together and tested as part of our life testing processes.

Worldwide agency approvals cover the whole display, which is developed, built, serviced and supported by a true single source supplier. The 1991L open-frame LCD touch display provides an economical solution for system integrators and VARs.

1093L 10-inch Open-Frame Touch Display

The Elo 1093L 10" open-frame LCD touch display provides an additional compact size to complement the family of touch solutions for kiosk, gaming, amusement, and industrial automation. Featuring a slim design and narrow outside dimensions, the state-of-the-art energy-saving LED backlight uses less electricity to operate and generates less heat.

This compact touch display is "designed for touch," with proven Elo expertise and reliability built in. The 1093L provides stable "drift-free" operation with outstanding image clarity and light transmission—for accurate touch responses and vivid images. The touchscreen is sealed against dirt, dust and liquids, which simplifies integration into the final enclosure. Long-lasting product availability can be expected as the design and tooling is controlled by Elo specifications.

This seamless zero-bezel 10" multi-touch

display is available with our latest projected capacitive (PCAP) 2GS (two glass solution) technology that delivers both a ten touch "tablet like" interactive experience along with thru-glass functionality - both modes support single or dual latex gloves as well as cloth gloves.

At Elo, we design, build and are responsible for the complete solution with touch integrated from the start. We use our own touchscreens combined with our software and drivers, everything is designed to work together and tested as part of our life testing processes.

Worldwide agency approvals cover the whole display, which is developed, built, serviced and supported by a true single source supplier. The 1093L open-frame LCD touch display provides an economical solution for system integrators and VARs.

Benefits

- 10 touch projected capacitive (PCAP) with Thru-glass capabilities that passes UL-60950 & IK-07 Impact testing
- PCAP 2GS (two glass solution) offers pristine optical clarity and touch durability
- Touchscreen sealed against dirt, dust and liquids
- Easy to integrate with mounting holes on all 4 sides and rear 75mm VESA mount
- Display Port and VGA video interfaces

Application

- Casino and amusement games
- Retail self-service
- Kiosks
- Industrial Automation

2094L 19.5-inch LED Open-Frame Touchmonitor

The Elo 2094L 19.5" open-frame LCD touch display features a slim design and narrow outside dimensions due to the state-of-the-art energy-saving LED backlight, using less electricity to operate and generating less heat. Featuring a brilliant wide viewing angle panel, the 2094L instantly grabs and holds the users' attention for kiosks, casino and amusement, retail self-service, and industrial floor automation.

This compact touch display is "designed for touch" with proven Elo expertise and reliability built in. The 2094L provides stable "drift-free" operation with outstanding image clarity and light transmission—for accurate touch responses and vivid images. The touchscreen is sealed against dirt, dust and liquids, which simplifies integration into the final enclosure. Long-lasting product availability can be expected as the design and tooling is controlled by Elo specifications.

Available with a choice of industry-leading touch technologies, in single- or multi-touch technology, including

IntelliTouch® single-touch surface acoustic wave (SAW) touchscreen technology, and Elo's latest projected capacitive (PCAP) 2GS (two glass solution) multi-touch display with zero-bezel, offering both a ten touch "tablet like" interactive experience along with thru-glass functionality - both modes support single or dual latex gloves as well as cloth gloves.

At Elo, we design, build and are responsible for the complete solution with touch integrated from the start. We use our own touchscreens combined with our software and drivers, everything is designed to work together and tested as part of our life testing processes.

Worldwide agency approvals cover the whole display, which is developed, built, serviced and supported by a true single source supplier. The 2094L open-frame LCD touch display provides an economical solution for system integrators and VARs.

2794L 27-inch Open-Frame Touch Display

The Elo 2794L 27" open-frame LCD touch display features a slim design and narrow outside dimensions due to the state-of-the-art energy-saving LED backlight, using less electricity to operate and generating less heat. Featuring a brilliant wide viewing angle panel, the 2794L instantly grabs and holds the users' attention for kiosks, casino and amusement, retail self-service, and industrial automation.

This compact touch display is “designed for touch” with proven Elo expertise and reliability built in. The 2794L provides stable “drift-free” operation with outstanding image clarity and light transmission—for accurate touch responses and vivid images. The touchscreen is sealed against dirt, dust and liquids, which simplifies integration into the final enclosure. Long-lasting product availability can be expected as the design and tooling is controlled by Elo specifications.

Available with a choice of industry-leading touch technologies, in single-, dual- or multi-touch technology,

including IntelliTouch® Plus dual-touch surface acoustic wave (SAW) touchscreen technology, IntelliTouch single-touch SAW, iTouch® single-touch with zero-bezel, and Elo's latest projected capacitive (PCAP) 2GS (two glass solution) multi-touch display with zero-bezel, offering both a ten touch “tablet like” interactive experience along with thru-glass functionality - both modes support single or dual latex gloves as well as cloth gloves.

At Elo, we design, build and are responsible for the complete solution with touch integrated from the start. We use our own touchscreens combined with our software and drivers, everything is designed to work together and tested as part of our life testing processes.

Worldwide agency approvals cover the whole display, which is developed, built, serviced and supported by a true single source supplier. The 2794L open-frame LCD touch display provides an economical solution for system integrators and VARs.

Benefits
